# Integrated Ocean Drilling Program Reports and Publications

This document summarizes all the scientific report and publication series to be produced by the Integrated Ocean Drilling Program (IODP).

**Report Series:**
Description: There will be three different report series:

- **Technical Notes:** Program-related scientific and engineering operational documentation.
- **Scientific Prospectus:** An outline of the expedition plan. Published a minimum of two months before an expedition.
- **Preliminary Report:** A summary of the expedition technical operations and scientific results and comparison of expedition results to the expedition plan outlined in the Scientific Prospectus. Published within two months after an expedition.

Format and Distribution: All reports will be published electronically and made available for free on the Web.

**Publication Series:** *Proceedings of the Integrated Ocean Drilling Program*
Description: A serial publication that contains a detailed summary of expedition technical operations and scientific results and related peer-reviewed data reports and synthesis papers that cover postexpedition research. A single *Proceedings* volume will be published for each IODP expedition or series of related expeditions as determined by IODP-MI.

- **Expedition Reports**: Record of the expedition objectives, thorough summary of the cruise scientific and engineering results, and core description data.
- **Expedition Research Results**: Peer-reviewed data reports and synthesis papers based on postexpedition research.
- **Supplementary Material:** Supplemental data in proprietary formats (in formats other than PDF or ASCII, such as Excel) that the science party chooses to include with the volume**.**
- **Drilling Location Maps:** Site maps showing the locations for all Integrated Ocean Drilling Program (IODP), Ocean Drilling Program (ODP), and Deep Sea Drilling Project (DSDP) drilling sites.
- **Expedition-Related Bibliography:** A list of references from expedition-related publications. The list may also link to abstracts and/or papers that are published electronically in open access journals or in other journals that will provide open access to publications that contain results from IODP data. The "Ocean Drilling Citation Database" will also be available on the Web. This database is produced by the American Geological Institute and contains more than 20,000 citations related to DSDP, ODP, and IODP research spanning from 1969 to the present.
- **Index:** An index or search feature that covers the *Proceedings of the Integrated Ocean Drilling Program.*

Format: This publication will be published electronically. The entire contents will be available on the Web in PDF and HTML formats. The Expedition Reports, Supplementary Material, and Drilling Location Maps sections will also be reprinted on disc in PDF format.

Distribution: The Expedition Reports, Supplementary Material, and Drilling Location Maps sections will be available on the Web after expiration of the moratorium period, reprinted on disc, and distributed to the expedition participants and the IODP member countries/consortia. The Expedition Research Results section will be populated when manuscripts are ready for publication (between one and four years postmoratorium). The Expedition-Related Bibliography section will be updated routinely as new publications are released.

**Program Journal:** *Scientific Drilling*
Description: A journal published biannually in collaboration with the International Continental Scientific Drilling Program (ICDP) that will contain brief scientific expedition and project reports, technical and scientific review articles, and news and views related to scientific drilling. Although some project and review contributions may be reviewed by external reviewers, the journal is not a peer-reviewed journal per se.

Format: This publication will be printed. It will also be available on the Web in PDF format.

Distribution: It will be distributed to member countries/consortia and to libraries that have expressed interest in receiving it.

# Diagram of IODP Reports and Publications

## Report Series

- **Technical Notes**
- **Scientific Prospectus**
- **Preliminary Report**

## Publication Series

- ***Proceedings of the Integrated Ocean Drilling Program***
  - **Expedition Report**
    - Chapters
    - Core Descriptions
  - **Expedition Research Results**
    - Data Reports
    - Syntheses
  - **Supplementary Material**
  - **Drilling Location Maps**
  - **Expedition-Related Bibliography**
  - **Index/Search Feature**

## Program Journal

- ***Scientific Drilling***

Published in collaboration with the International Continental Scientific Drilling Program (ICDP)
