

## Science Reports

- 4** IODP Expeditions 304 & 305 Characterize the Lithology, Structure, and Alteration of an Oceanic Core Complex  
by Benoit Ildefonse, Donna Blackman, Barbara E. John, Yasuhiko Ohara, D.Jay Miller, Christopher J. MacLeod, and the IODP Expeditions 304-305 Scientists
- 12** Rapid Sedimentation, Overpressure and Focused Fluid Flow, Gulf of Mexico Continental Margin  
by Jan H. Behrmann, Peter B. Flemings, Cédric M. John, and the IODP Expedition 308 Scientists
- 18** Stages of Gas Hydrate Evolution on the Northern Cascadia Margin  
by Michael Riedel, Timothy S. Collett, Mitchell J. Malone, and the IODP Expedition 311 Scientists
- 25** The Lake Petén Itzá Scientific Drilling Project  
by David Hodell, Flavio Anselmetti, Mark Brenner, Daniel Ariztegui, and the PISDP Scientific Party

## Progress Reports

- 30** Building a Natural Earthquake Laboratory at Focal Depth (DAFSAM-NELSAM Project, South Africa)
- 34** Chesapeake Bay Impact Structure Deep Drilling Project Completes Coring
- 38** Muroto Project: Scientific Drilling of the Late Pliocene Forearc Basin Deposit on the West Coast of Muroto Peninsula, Shikoku, Japan
- 40** Two Massive Hydraulic Tests Completed in Deep KTB Pilot Hole

## Program Developments

- 43** Deep Drilling with the ANDRILL Program in Antarctica
- 46** The Micropaleontological Reference Centers Network
- 50** An Overview of IODP Scientific Publications

## Technical Developments

- 52** Drilling Vessel *Chikyu*: Status, Capabilities, and Current Operations

## Workshop Reports

- 54** Investigating Maar Formation and the Climate History of Southern Argentina—the Potrok Aike Maar Lake Sediment Archive Drilling Project (PASADO)
- 56** HOTSPOT: The Snake River Scientific Drilling Project—Tracking the Yellowstone Hotspot Through Space and Time
- 58** Workshop on the Development of the CoreWall Suite of Applications

## News and Views

- 61** Upcoming Workshops
- 62** News Items  
SHALDRIL, ICDP Web site, School of Rocks
- 64** Roger Larson (1943–2006): Cretaceous Magnetic Reversals, Super-plumes, and the Tectonic Reconstruction of the Pacific
